### Reactive Stream

The screenshot shows the Alpakka Documentation website for Version 5.0.0. The left sidebar lists various integration points: Overview, Data Transformations, AMQP, Apache Camel, Apache Cassandra, Apache Geode, Apache Kafka, Apache Kudu, Apache Solr, Avro Parquet, AWS EventBridge, AWS DynamoDB, AWS Kinesis and Firehose, AWS Lambda, AWS S3, AWS SNS, AWS SQS, Azure Storage Queue, Couchbase, Elasticsearch, and Eventuate. The main content area has four sections: Overview, Data Transformations, Apache Camel, and Apache Cassandra. The Overview section contains links to Versions, Contributing, External Components, Self-contained examples, Other documentation, Integration Patterns, and Release Notes. The Data Transformations section contains links to Parsing Lines, JSON, Compressing/decompressing, Comma-Separated Values - CSV, RecordIO Framing, Text and charsets, and Extensible Markup Language - XML. The Apache Camel section contains a link to External library. The Apache Cassandra section contains links to Artifacts, Sessions, Reading from Cassandra, Writing to Cassandra, and Custom Session creation.

**Alpakka Documentation**  
Version 5.0.0  
Java

**Overview**  
Data Transformations  
AMQP  
Apache Camel  
Apache Cassandra  
Apache Geode  
Apache Kafka  
Apache Kudu  
Apache Solr  
Avro Parquet  
AWS EventBridge  
AWS DynamoDB  
AWS Kinesis and Firehose  
AWS Lambda  
AWS S3  
AWS SNS  
AWS SQS  
Azure Storage Queue  
Couchbase  
Elasticsearch  
Eventuate

**Alpakka Documentation**

The [Alpakka project](#) is an open source initiative to implement stream-aware and reactive integration on top of [Akka Streams](#), and has been designed from the ground up to understand streaming natively and provide a clean API for reactive programming, with built-in support for backpressure. Akka Streams is a [Reactive Streams](#) and JDK 8 Stream API implementation and therefore [fully interoperable](#) with other implementations.

**Overview**

- Versions
- Contributing
- External Components
- Self-contained examples
- Other documentation
- Integration Patterns
- Release Notes

**Data Transformations**

- Parsing Lines
- JSON
- Compressing/decompressing
- Comma-Separated Values - CSV
- RecordIO Framing
- Text and charsets
- Extensible Markup Language - XML

**Apache Camel**

- External library

**Apache Cassandra**

- Artifacts
- Sessions
- Reading from Cassandra
- Writing to Cassandra
- Custom Session creation

- <https://doc.akka.io/docs/akka/current/stream/stream-flows-and-basics.html> - Akka Stream API .
